**DETAILED ACTION**

**EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jonathan Bowser on 28 April 2005.

The application has been amended as follows:

Claims 16 – 22 and 27 are canceled.

***Allowable Subject Matter***

Claims 1 – 15 and 23 – 26 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Regarding Claims 1 and 23, all elements of the claim are taught by the prior art of record with the exception of "demultiplexing means for demultiplexing the program data received by said receiving means into program components, each program component representing data of a multimedia type and spanning a same play-back length as the program data" which is taught by Barton (U.S. 6,233,389). The newly added limitation of "replacing means for substituting, when the program data stored in said secondary storing means contains an incomplete program component, the

Art Unit: 2644

incomplete program component at a point of discontinuation of the incomplete program component with a corresponding remainder portion of another program component in a same class as the incomplete program component" is not taught or suggest by the prior art. In particular, the limitation of replacing with a corresponding "remainder portion of another program component in the same class" as the program component is not taught.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
